Raquel,

We are pleased to see you have started your campaign at Waggle and look forward to bringing your campaign live at Waggle!

Before we can start helping you raise funds, however, we'll need additional info from you about your pet so that we can create an effective campaign that you can share on social media. Please return to login in at [Waggle](#) to provide this information.

We know that you want to give your pet the greatest chance at the best care possible, so please tell us as much as you can so that we can write a compelling story.

**Tip: Your Story - Some things to think about that may help you provide us more info about your pet:**

How many years are you together?

Do you have a daily routine or regular activities you share?

Who is the primary caregiver to the animal?

What are the animal's favorite activities/toys/meals/treats/games?

What are some of the cute/quirky things that your animal does?

Does he/she have a special, odd, or unusual personality trait?

---

Waggle is the only pet-dedicated crowd-funding platform that partners directly with leading veterinary practices to provide options for pet guardians and second chances to the pets they love.

100% of donations is used to fund the cost of care

To learn more, please visit [waggle.org](#)

Thanks a lot for your reply... But I don't use social media. I don't have too much friends there. the last time i tried, i downloaded a Chinese social media (malware media).

**Tip: Your Story - Some things to think about that may help you provide us more info about your pet:**

**How many years are you together?**

I found her at a street market, very thing, dirty, in a small cage with mouse... I bought her ( I don't usual buy animals, but she deserve a better life)  
I left her with 1 year. She is 4 years old now.

**Do you have a daily routine or regular activities you share?**

I work at home with my computer. So, 24h together. The others were the same. Imagine shared a bedroom 5 years with two animals that trust in you and only in you... Was har to recover. And I didn't forget them.

**Who is the primary caregiver to the animal?**

Well... it depends what do you mean. I was taking care and loving her. My Pokazac always making me smiling. Now she is in a small cage to receiving food. She would come with me, but her passport was not ready... and after I saw that was not easy rent a medium place with my currency. Now is better. I'm looking for a land for our handmade house :)

**What are the animal's favorite activities/toys/meals/treats/games?**

Destroy. She likes to run a lot, then she stops quickly, and jump to the back. She is a bit crazy when she is happy. She doesnt like toys, only furniture. She likes when i touch her head. When I had 2, one rabbit did it in the other. Meals? She can attack for an apple :P

**What are some of the cute/quirky things that your animal does?**

"Every little thing she does is magic", even if is destroy something. When there is love, there is no sacrifice (Sri Sri Shankar)

**Does he/she have a special, odd, or unusual personality trait?**

People need to win friendship. She is afraid and doesn't trust in others easily.

I have her in my desktop with my handmade house and a jeep (+surfboard). <3 dream list

Do you think I can have money for the land (20.000)? I build by myself.
